PROFESSIONAL SUMMARY

Senior full-stack engineer with 10+ years shipping production TypeScript/React/Node.js applications end-to-end - complex data-driven product UIs, backend services, and cloud infrastructure - across B2B SaaS and high-traffic consumer platforms. Track record: TypeScript modernization of a production React codebase, real-time data pipeline product on Cloudflare Analytics Engine, 90% CI/CD speedup via Turborepo, and full AWS-to-GCP migration. Daily Claude Code user shipping production TypeScript with AI-augmented workflows. Comfortable across React, Node.js, REST APIs, Playwright, Datadog, and multi-cloud (AWS, GCP, Cloudflare). Strong fit for Frontend IC roles building data workflow and GTM tooling products for self-serve and enterprise customers.

CORE COMPETENCIES

TypeScript & React Product Engineering

Complex Data-Driven UI Patterns

B2B SaaS Frontend Development

REST API & Real-Time Data Pipeline Integration

Frontend Performance at Scale

CI/CD & Monorepo Engineering (Turborepo)

Multi-Cloud: AWS · GCP · Cloudflare Edge

AI-Augmented Engineering (Claude Code)

WORK EXPERIENCE

Enzuzo 03/2023 - Present

Senior Software Engineer · Kitchener, ON (Remote)

- Frontend / Product UI:** Built complex B2B SaaS product surfaces by rewriting a legacy JavaScript/React codebase into a fully typed, schema-driven TypeScript + modern React system - improving development velocity, reducing defect rates, and enabling long-term feature delivery for self-serve and enterprise customers.
- Real-Time Data Product:** Designed and shipped a real-time data pipeline product on Cloudflare Workers + Analytics Engine + KV/R2 - customer-facing analytics delivered at edge latency, privacy-safe by construction, serving both self-serve and enterprise tiers.
- Backend / APIs:** Built and maintained Node.js backend services and REST APIs supporting configuration, data processing, multi-tenant customer workflows, and webhook orchestration.
- CI/CD & Developer Experience:** Cut pipeline time 90% by migrating to a Turborepo monorepo with build parallelization and incremental caching - directly improving engineering velocity and release cadence.
- Cloud Migration:** Migrated all production workloads from AWS to GCP (Cloud Run, GKE, BigQuery) end-to-end, improving observability and reducing infrastructure cost.

TypeScript · React · Node.js · Cloudflare (Workers, Analytics Engine, KV, R2) · GCP · AWS · Turborepo · PostgreSQL · Redis · Docker · GitHub Actions

TELL - Wallpapers.com & PDFBear.com 07/2017 - 03/2023

Senior Software Engineer · Vancouver, BC

- Frontend at Scale:** Developed and maintained frontend features across high-traffic consumer platforms serving tens of millions of users - TypeScript/JavaScript, React, performance-optimized rendering under sustained high-volume concurrent load.
- Data Pipelines:** Built large-scale content ingestion, processing, and delivery pipelines using TypeScript/Node.js and SQL databases supporting millions of daily requests.
- Growth & Analytics:** Implemented data-driven acquisition and automation systems using analytics, keyword intelligence, and performance monitoring - contributing to 165% cross-project revenue growth and 35% improvement in project ROI.
- SEO Architecture:** Designed structured data, metadata automation, and category/page generation systems sustaining long-term organic traffic growth across properties.

TypeScript · JavaScript · Node.js · React · MySQL · PostgreSQL · Redis · Nginx · Cloudflare · Docker · GitLab CI/CD

Software Engineer · Victoria, BC

- Developed backend services, workflow automation engines, and REST APIs for a multi-tenant SaaS platform serving enterprise customers across multiple verticals.
- Built QA and test automation tooling (Selenium/Jest) that reduced regressions and improved release confidence across product lines.
- Contributed to architectural improvements reducing resource consumption and increasing throughput at scale.

Node.js · JavaScript · MySQL · PostgreSQL · Redis · Docker · AWS · Grafana · Prometheus

KEY PROJECTS

Real-Time Consent Analytics Platform Production · Enzozo

Designed and shipped a real-time analytics product from scratch on Cloudflare Workers + Analytics Engine + KV/R2. Customer-facing data pipeline delivering privacy-safe insights at edge latency - replacing batch reporting with sub-second time-series queries globally. Full product ownership: architecture, implementation, and rollout to enterprise customers.

TypeScript · Cloudflare Workers · Analytics Engine · KV · R2 · React · Node.js

Turborepo Monorepo + CI/CD Overhaul Production · Enzozo

Migrated a multi-package codebase to a Turborepo monorepo with pnpm workspaces, build parallelization, and incremental caching. Reduced CI/CD pipeline time by 90% - from 10+ minutes to under 1 minute - improving developer experience, deployment cadence, and build reliability.

Turborepo · pnpm · GitHub Actions · TypeScript · Docker

EDUCATION

B.S., Software Engineering - University of Victoria

2016 · Victoria, BC

SKILLS

Languages: TypeScript, JavaScript (ES6+/ES2024), Node.js, SQL (PostgreSQL, MySQL)

Frontend: React 18+, Next.js, modern hooks, schema-driven UI, design systems, SSR/SSG/ISR, web performance, SEO architecture, a11y, Tailwind CSS, Vite

Backend: Node.js, Express, Fastify, Hono, REST APIs, real-time data pipelines, WebSockets, webhooks, multi-tenant SaaS patterns, event-driven architecture

Cloud: AWS (EC2, RDS, S3, Lambda, ECS), GCP (Cloud Run, GKE, BigQuery, Pub/Sub), Cloudflare (Workers, Analytics Engine, KV, R2, D1, Durable Objects, Pages)

Infra / DevOps: Docker, Linux, Nginx, Terraform, GitHub Actions, GitLab CI/CD, Turborepo + pnpm, Datadog, Grafana, Prometheus, Sentry

Testing: Playwright, Vitest, Jest, React Testing Library, Storybook

AI Engineering: Daily Claude Code user · Vercel AI SDK · OpenAI / Anthropic APIs · MCP servers · Cursor

Domain: Privacy / Compliance (GDPR, CCPA, IAB TCF), consent management at scale, privacy-safe analytics, data residency
